## Licence

This source file is subject of **commercial license**.

Each **license is single** and can be installed and used on only **one shop**.

Reproduction in whole or part of this module, of one or more of its components, using any process, and without **express permission**, is **prohibited**.

If you did not receive this module from us, please contact us.

**Do not edit or add any file to this module** if you wish to upgrade it to newer versions in the future.

If you want to customize this module to your specific needs, contact us!

## About

**Prepayment** module is a **payment module** using **prepaid account**. It allows your customers to credit a cash reserve they use later to pay their orders.

Module has two parts:

- First, manage your prepaid account : **balance**, **history**, and **account recharge**
- Then, use your prepaid account as **payment method** to order in shop

Using back-office interface you can setup **prepaid amounts** for recharge account and follow your customers activity (**balance**, operations **history**). You can also allow **negative balance** to a maximum amount.

## Support

For any **bugs**, please contact us, we make **free patch**.

We **often** provide update for this module, with brand **new features**.

Keep in touch!

# MODULE INSTALLATION

## Prerequisites

You need a working **version 1.5.x of PrestaShop** installed on your web server:

<http://www.prestashop.com/en/download>

## Installation

This module installs **seamlessly** on your shop, **no core file is altered or modified**, giving you possibility for further shop updates.

- 1) **Unzip archive** containing module into a temporary directory
- 2) Transfer the entire directory's contents into « **Your shop's directory/module/** »
- 3) Open your shop back office, click on « **Modules** » tab, select « **Payment & Gateways** » category, and click on « **Install** » button on the right of **Prepayment** module:

The screenshot shows the 'Module : List of modules' interface in PrestaShop. On the left, a sidebar lists various module categories, with 'Payments & Gateways' highlighted and showing 11 modules. The main content area displays a list of modules under the 'Authorize.net (Addons)' category. The modules listed are:

- Bank Wire** (Installed): Developed by PrestaShop, Version 0.5, Category: Payments & Gateways. Description: Accept payments by bank wire. Buttons: Uninstall.
- Buyster (Addons)** (Not Installed): Developed by Prestashop, Version 1.4.1, Category: Payments & Gateways. Description: Buyster est une solution de paiement à distance pour développer votre activité sur Internet fixe et mobile. Button: Install.
- Cash on delivery (COD)** (Not Installed): Developed by PrestaShop, Version 0.4, Category: Payments & Gateways. Description: Accept cash on delivery payments. Button: Install.
- Check** (Installed): Developed by PrestaShop, Version 2.3, Category: Payments & Gateways. Description: Module for accepting payments by check. Buttons: Disable, Reset, Configure, Delete.
- PayPal (Addons)** (Not Installed): Developed by Prestashop, Version 3.4.1, Category: Payments & Gateways. Description: Ce module vous est offert par PayPal, il est déjà intégré dans la version 1.4 de PrestaShop. Téléchargez-le gratuitement pour la version 1.3. Button: Install.
- Prepayment** (Not Installed): Developed by DrySs' Agency, Version 0.1, Category: Payments & Gateways. Description: Prepayment solution - Prepaid account paiement - DrySs' Agency. Button: Install (highlighted with a red box).
- ReceiveAndPay devient Kwixo (Addons)** (Not Installed): Button: Install.

## HOW DOES IT WORK?

**Prepayment** module works seamlessly on a PrestaShop store.

Module has two parts:

### 1) Prepaid account

Each customer can **recharge its prepaid account**, using a defined **amounts list** (eg: \$10, \$25, \$50, etc).

Each amount is **linked to an existing product** in catalog. **Product price** is used as amount.

You need to **create a product** for **each amount**. This way your customers will be able to use classical PrestaShop order process to recharge their prepaid account.

A **bloc** is added on right **column**, displaying current prepaid account balance and a recharge account button.

### 2) Payment module

Once its prepaid account is credited, customer can use « **Prepaid account** » payment method in order process. Customer prepaid account is then automatically **debited** using **order total price**, and its status marked as validated.

A « **Prepaid buy** » button is added on each product sheet, to make an express checkout using prepaid account.

You can follow **operations history** (debit/credit) in back-office interface, and edit whenever you want customers balance.

You can allow your customers to have **negative balance**, with a maximum possible amount.

You have the possibility to define an **extra amount** that will be offered for each recharge (eg : 15€ offered for 50€ credited).

Module fully handle **multi-currencies**: prepaid account balance are handle with default currency, and each operation is managed with its own currency.

Module is a classical payment method : enabled or not and **restricted** by **customers group**, by **currencies** or by **countries**.

## BACK-OFFICE FEATURES

Created a main tab **Prepayment** in back-office with:

- **History**
  - Operations **history** (debit/credit) listing with summary & filter
  - **Add/edit/delete** operation (customer, amount)
- **Balances**
  - Customers **balance** listing with summary & filter
- **Amounts**
  - Product used as **amounts** recharge listing
- **General settings**
  - Configuration of **general** module **settings**

## FRONT-OFFICE FEATURES

### Product sheet

- « **Prepaid buy** » button for an express checkout using prepaid account

### Column block

- **Block** in right **column**
- Display prepaid account current **balance**
- **Recharge** prepaid account button

### My account page

Customer summary:

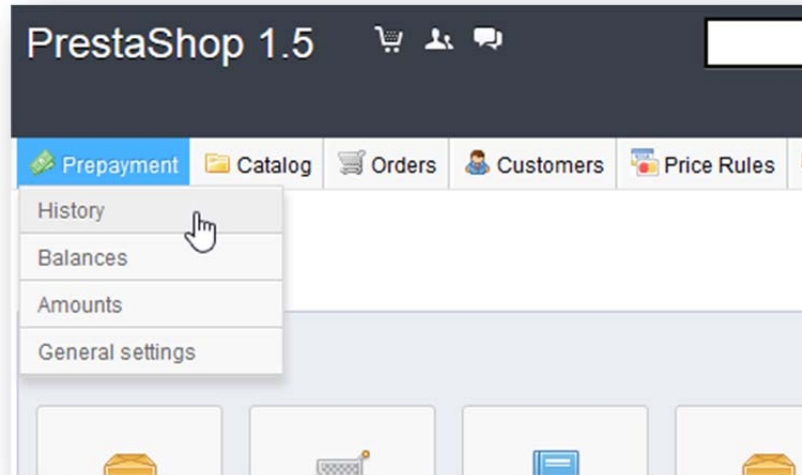

- Prepaid account current **balance**
- Operations **history** (débit/crédit)
- **Recharge** prepaid account form

### Payment gateway

- « **Paid with prepaid account** » as payment method choice in payment gateways

## BO: OPERATIONS HISTORY

Follow all operations **history** (debit/credit) on your customers prepaid account by using main tab of **Prepayment** module.

Prepayment > History + Add new

**Prépaiement**

#### Prepayment settings

Prepayment amount ☒ ☐

Use this product as prepayment amount to reload prepayment account.

Extra amount  Amount (€)

Define an extra amount that will be offered for each recharge.

## BO: ADD A NEW AMOUNT

To add a **new amount** (used by your customers to **recharge** their prepaid), you need to **create a new product** in your **catalog**. This product will only be used to recharge prepaid account.

Select tab **Catalog**, then **Products**, and click on « **Create** ».

Product parameters :

- 1) Select the **type of product** to « **Virtual product** »
- 2) Type a **name**, like « **Amount 1** » (will not be displayed to customer)
- 3) Select **visibility** to « **Nowhere** » (to hide it from catalog)
- 4) Enter a **retail price**, this one will be **amount used** to recharge prepaid account
- 5) Click on « **Save and stay** »
- 6) In **quantities** tab, select « **Allow orders** » when **out of stock**
- 7) Finally, in **Prepayment** tab (last one), select « **Yes** » for prepayment amount
- 8) Click on « **Save** »

**Save** your product, you now have created a **new amount**, available to recharge a prepaid account.

Check that your amount is well created by using main tab of **Prepayment** module, then « **Amounts** ».

Repeat this operation for each amount to add.

On every product sheet is displayed a « **Prepaid buy** » button, to make an express checkout using prepaid account.

On every shop's page is displayed a **block in right column** (customizable position) with a summary of customer prepaid account : **current balance** and account **recharge button**.

The screenshot shows a mobile app interface. At the top, there's a dark header. Below it, a section titled 'PREPAID ACCOUNT' in a dark box. The text 'Your prepaid account is the easiest way to shop!' is displayed. The 'Current balance:' is shown as '19,61 €' in green. A yellow button labeled 'Recharge my account' is below. To the left, a dropdown menu is partially visible. Below the prepaid account section is a 'TOP SELLERS' section, also in a dark box. It lists three items: 1. 'iPod touch' with a price of '289,00 €' and a small image of the device. 2. 'Amount 3' with a price of '28,00 €' and a placeholder image labeled 'No image available'. 3. 'Amount 2' with a price of '18,00 €' and a placeholder image. To the left of the top sellers, there are buttons for 'cart' and 'buy'.

**PREPAID ACCOUNT**

Your prepaid account is the easiest way to shop!
